Profile Summary

Computer Science undergraduate with hands-on experience in full-stack development and AI applications. Proficient in Python, JavaScript, React, FastAPI, and MongoDB, with a strong foundation in REST APIs and modern software engineering.

Experience

AICTE Edunet Foundation (IBM SkillsBuild) <i>AI & IT Intern</i>	Remote <i>Sep 2025 – Oct 2025</i>
- Completed industry-oriented training in Artificial Intelligence through IBM SkillsBuild, covering machine learning, generative AI, and real-world AI applications. - Developed StudyMate Pro, an AI-powered learning assistant using Streamlit and Hugging Face APIs with AI Tutor, Notes Summarization, and Quiz Generation modules. - Integrated LLM APIs for intelligent content generation and deployed the application on Streamlit Cloud for real-time access.	

PROJECTS

DOCMIND AI <i>FastAPI, React, LangChain, Groq Llama 3.1, Hybrid RAG, ChromaDB, PostgreSQL</i>	Link
- Developed a production-grade Hybrid RAG Document Intelligence platform using FastAPI, React, LangChain, ChromaDB, and PostgreSQL, enabling semantic search, multi-document question answering, citation-aware AI interactions, and document analytics across uploaded files. - Engineered a Hybrid RAG pipeline with Parent-Child Chunking, BAAI/bge-base-en-v1.5 embeddings, BM25 lexical retrieval, Reciprocal Rank Fusion (RRF), and lightweight token-overlap reranking to improve retrieval accuracy, contextual relevance, and response quality. - Implemented asynchronous document ingestion using Celery and Redis, real-time response streaming with Groq Llama 3.1, conversation memory, multi-document comparison, AI-generated executive summaries, page-level citations, and structured information extraction.	
AI Image Generation SaaS Platform <i>React, Node.js, Express.js, MongoDB, GenAI, ClipDrop API</i>	Link
- Developed a full-stack AI image generation platform using React, Node.js, Express.js, and MongoDB, enabling users to generate high-quality images from natural language prompts using the ClipDrop API. - Implemented secure JWT-based authentication, user account management, image generation history, and cloud-based image storage for a personalized user experience. - Designed scalable REST APIs for prompt processing, image generation, credit management, and persistent storage, providing a responsive and production-ready AI application.	
SchemesMadeSimple <i>React, FastAPI, PostgreSQL, Groq Llama 3, AI Search</i>	Link
- Developed an AI-powered platform for discovering Indian government welfare schemes using React, FastAPI, PostgreSQL, and Groq Llama 3, enabling intelligent scheme search, eligibility guidance, and legal assistance. - Built a real-time AI discovery pipeline using DuckDuckGo Search, BeautifulSoup, and Groq Llama to extract structured scheme information from .gov.in websites and automatically populate the application database. - Implemented an AI Copilot with contextual conversations, semantic search, personalized recommendations, and retrieval-grounded responses to simplify government scheme discovery and application guidance.	

Technical Skills

Programming Languages: C, C++, Python, JavaScript
Technologies/Frameworks: MERN Stack (MongoDB, Express.js, React.js, Node.js), FastAPI, Streamlit, REST APIs
Developer Tools: Git, GitHub
Databases: MySQL, PostgreSQL, MongoDB
AI & Automation: AI Agents (Multi-Agent Systems, RAG), Python Automation

Certifications

Salesforce Certified Agentforce Specialist – Salesforce	<i>Dec 2025</i>
MongoDB Associate Developer – MongoDB	<i>Dec 2024</i>
Web Development Training (Top Performer) – Internshala	<i>Dec 2024</i>

Education

Chaitanya Bharathi Institute of Technology (CBIT) <i>B.E. in Information Technology – CGPA: 8.98</i>	Hyderabad, India <i>2023 – 2027</i>
